Education

Masters in Computer Science Aug 2025 – May 2027

Bowling Green State University, Ohio, United States

CGPA: 3.0/4.0

Bachelor of Engineering in Artificial Intelligence & Data Science Aug 2021 – May 2025

Guru Nanak Institute of Technical Camp, India

CGPA: 7.5/10.0

Technical Skills

Programming Languages: C#, C Sharp, Python, C, JavaScript, SQL

Game Development: Unity Engine, Game Physics, 3D Modeling Integration, Game Mechanics Design

Data Analysis & Visualization: Power BI, Tableau, Excel, Power Query, NumPy, Pandas

Database Systems: MySQL, Snowflake, PostgreSQL, NoSQL (MongoDB)

Web Technologies: HTML5, CSS3, Bootstrap, React.js, Node.js, Responsive Design

Data Skills: Data Cleaning, Data Transformation, Data Visualization, Statistical Analysis, Reporting Services, Machine Learning

Tools & Platforms: Git, GitHub, VS Code, Docker, CI/CD Principles, AWS Cloud

Professional Experience

Software Engineering Intern Jun 2024 – Aug 2024

DRDO (Defence Research and Development Organisation), Hyderabad, India

Assisted in developing data-driven applications using Python and SQL, supporting backend data processing workflows

Implemented backend logic for data validation, transformation, and storage, improving data reliability

Debugged and optimized application code to enhance performance and maintainability

Worked closely with team members in an agile development environment, participating in sprint planning and code reviews

Collaborated with cross-functional teams to understand requirements and deliver functional solutions on time

Data Analytics Intern Jan 2024 – May 2024

Tech Solutions Pvt. Ltd., Hyderabad, India

Analyzed large datasets using Python (Pandas, NumPy) to identify business trends and generate actionable insights for stakeholders

Developed interactive dashboards in Power BI and Tableau, improving data accessibility for 50+ business users

Performed data cleaning and transformation using Excel and Power Query, ensuring data quality and consistency

Collaborated with business analysts to define KPIs and metrics, contributing to strategic decision-making processes

Automated reporting workflows, reducing manual reporting time by 40% through Python scripting

Technical Projects

Machine Learning – Predictive Analytics System Python, Scikit-learn, Pandas, Data Analysis

Built predictive analytics system using machine learning algorithms to forecast trends with 85% accuracy

Implemented data preprocessing pipeline handling 5000+ records, including feature engineering and data normalization

Applied supervised learning algorithms including Random Forest and Gradient Boosting for classification tasks

Visualized model performance metrics and feature importance using Matplotlib and Seaborn libraries

Demonstrated ability to learn and adapt to new technologies quickly while solving complex analytical problems

Visualization in Snowflake Snowsight Snowflake, Tableau, Power BI

Built interactive analytics dashboard in Snowflake Snowsight to visualize customer behavior and sales trends, demonstrating proficiency in cloud-based data platforms

Integrated Snowflake with BI tools including Tableau and Power BI for advanced reporting and cross-functional collaboration

Implemented data visualization best practices to transform complex datasets into actionable business insights

Optimized query performance and data processing workflows for real-time analytics capabilities

Real-Time Web Application React.js, Node.js, MongoDB, REST APIs

Developed full-stack web application using React.js frontend and Node.js backend with MongoDB database

Implemented RESTful APIs for seamless client-server communication and real-time data synchronization

Designed responsive user interface with modern CSS frameworks ensuring cross-device compatibility

Integrated authentication and authorization systems for secure user access management

Data Analytics Dashboard Python, Pandas, NumPy, Power BI

Developed comprehensive data analytics solution using Python libraries (Pandas, NumPy) for data cleaning and transformation

Created interactive dashboards in Power BI to visualize key performance metrics and business trends

Performed statistical analysis and data modeling to extract actionable insights from large datasets

Automated data processing workflows using Power Query, reducing manual data preparation time by 60%

Certifications and Additional Qualifications

Data Analytics Certification - NxtWave | Comprehensive training in data analysis, visualization, and reporting

Python Programming Certification - NxtWave | Proficiency in Python for data analysis and scripting

MySQL Database Certification - NxtWave | Database design, query optimization, and data management

Web Development (HTML, CSS, Bootstrap) - NxtWave | Frontend development and responsive design principles
